

CNC Machinist *(Setup & Programming)*

N.E.T. & Die, is in business to exceed our customers expectations in quality, delivery, and cost through continuous improvement and customer collaboration. Due to business growth, we are looking to fill several CNC Machinist positions in our family owned, custom machine shop which has been in business for over 50 years. N.E.T. specializes in low volume, high mix manufacturing, making medium to large size components for a variety of industries. We are a manufacturer utilizing processes, technologies and tooling to reduce waste and increase value to our customer. We are looking for someone whose reliability and great attitude will make them a vital part of a team that provides quality products and exceptional customer service. If you wish to make an impact and be part of a company that cares about you, this is the position for you.

The successful candidate will be able to perform duties and responsibilities as listed below and provide suggestions for efficiency improvements and assist machine operators.

What makes a successful NET & Die CNC Machinist?

A NET & Die CNC Machinist will efficiently and effectively program, set up and operate CNC vertical or horizontal mills (3 & 4 axis) and/or lathes (single and dual spindle with live tooling) independently. Assist in setup and programming for operators and run multiple machines simultaneously. N.E.T. & Die is a low volume, custom machine shop offering a challenging environment with new opportunities daily.
